SINTERCAST

SHARE PRICE (SEK): 92,50

NASDAQ OMX Small Cap

- Continued record series production
- Asia's increasing importance
- Positive momentum

Continued record series production. SinterCast reached an annualized series production in the first quarter of 2,0 m Engine Equivalents, providing an 18% year-on-year increase. This is the fifth consecutive quarter with record production. The series production benefitted among other things from accelerated growth of the Ford 2,7 litre V6 petrol engine. The record high production level, positive currency movements and production mix all contributed to an increased income from series production by approximately 40% to 16,3 MSEK (11,6). Income from sold equipment decreased somewhat compared to the corresponding quarter last year. Despite this, total income increased by almost 30%. Due to the large share of income from series production with high gross margin, the company reported an increased EBIT of 5,9 MSEK (2,9).

Asia's increasing importance. SinterCast has for a long time put a lot of effort to make inroads into the Asian Markets and it is thus rewarding to notice that twelve out of the last twenty installations have been made in the area. Asia currently accounts for 40% of the current 40 installations. All three agreements about new installations in Q1 were also made with partners in Asia.

Positive momentum. SinterCast is currently enjoying a very positive momentum based on the mounting interest in the production of Compacted Graphite Iron (CGI). The increased share of series production and currency movements should bolster gross margin. The current production programs alone provide an opportunity for a volume of 2.5 million Engine Equivalents. Almost as large volume of Engine Equivalents could be provided from the programs that are currently being developed. We believe this increase could come about without any large additional costs, which should lead to a margin increase. We increase our estimates both for sales and EBIT substantially

COMPANY DESCRIPTION

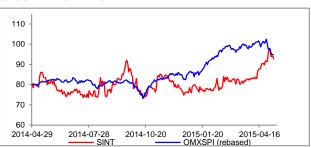

SinterCast is the world leading supplier of on-line process control technology and know-how for the reliabe high-volume production of Compacted Graphite Iron (CGI). The company provides CGI solutions to the world foundry and automotive industries. SinterCast is a publicly listed company on the NASDAQ OMX Stockholm Stock Exchange.
