- Another series production record
- New installations increasing
- Positive momentum

Another series production record. SinterCast reached a new record level in Q2 for its series production amounting to 2.2 million Engine Equivalents, expressed on a yearly basis. This is an increase of 30% and the sixth quarterly consecutive increase. The sharp increase is partly due to the success of Ford's 2.7 litres version of the V6 petrol engines. However total sales in the quarter fell short of our high expectations, given the strong recording in Q1 and the currency development. The shortfall in sales of new installations of new equipment and a low level income from services explains part of the deviation. Given the lower sales figure than we expected and currency losses our profit forecast turned out to be too optimistic.

New installations increasing. The absence of new installations of equipment in Q2 is not symptomatic for the year and should not be seen as a sign of decreasing interest in the technique. SinterCast has already obtained five new installation commitments, whereof three will be undertaken in Q3. 2015 could thus become a record year for new installations. However given the continuous rise in series production, installations are set to become a smaller part of total income.

Positive momentum. SinterCast is currently enjoying a very positive momentum based on the mounting interest in the production of Compacted Graphite Iron (CGI). The current production programs alone provide SinterCast an opportunity for a volume of 2.5 million Engine Equivalents. Almost as large volume of Engine Equivalents could be provided from the programs that are currently being developed. We believe this increase could arise without any large additional costs, which should lead to a margin increase. In spite of the lower than expected profit for Q2 we don't make any major changes in our estimates for the remaining part of the year.

COMPANY DESCRIPTION

SinterCast is the world leading supplier of on-line process control technology and know-how for the reliable high-volume production of Compacted Graphite Iron (CGI). The company provides CGI solutions to the world foundry and automotive industries. SinterCast is a publicly listed company on the NASDAQ OMX Stockholm Stock Exchange.
