

SinterCast is the world's leading supplier of process control technology for the reliable high volume production of Compacted Graphite Iron (CGI). As a specialist supplier of precision measurement and process control solutions to the metals industry, SinterCast also supplies a suite of tracking technologies, including the SinterCast Ladle Tracker® and SinterCast Cast Tracker® to improve process control, productivity and traceability in a variety of applications.

As a result of our growing customer activities – and our new product development – we now seek to expand the Team at our Technical Centre in Katrineholm with the following new position:

Systems Engineer

- Electrical wiring and mechanical assembly of industrial equipment
- Programming of PLC systems
- On-site commission, repairs and service of electro-mechanical equipment
- Technical support regarding all SinterCast hardware
- Customer training and hardware support
- Continuous development of the SinterCast technology
- Participation in product development and R&D activities of new products

Reporting to the Chief Engineer – Systems Development, the successful applicant will have a technical background with a minimum of two years industrial experience from industrial automation, electrical engineering or as an industrial electrician. This position offers exciting opportunities for self-motivated and flexible individuals who have a strong appreciation for full Customer service. SinterCast is active in Europe, Asia and the Americas. This position is based at our Technical Centre in Katrineholm, Sweden and will require international travel.

For further information contact Johan Antonsson, Chief Engineer – Systems Development, telephone +46 150 79440. Send your written application marked "Systems Engineer" before 31 October 2019 by e-mail to: info@sintercast.com.
