

SinterCast is the world's leading supplier of process control technology for the reliable high volume production of Compacted Graphite Iron (CGI). As a specialist supplier of precision measurement and process control solutions to the metals industry, SinterCast also supplies a suite of tracking technologies, including the SinterCast Ladle Tracker® and SinterCast Cast Tracker® to improve process control, productivity and traceability in a variety of applications.

As a result of our growing customer activities we now seek to expand the Team at our Technical Centre in Katrineholm with the following new position:

Quality and Supplier Development Engineer

- Supervise existing ISO 9001 quality system and secure new ISO/TS 16949 certification
- Monitor and analyse quality performance, reporting directly to executive management
- Inspection and auditing of systems and processes globally to ensure quality specifications are met
- Collaborate with all departments to develop and implement controls and continuous improvement
- Development and auditing of key suppliers to ensure product conformity and security of supply
- Participate in product development and R&D activities

Reporting to the Operations Director, the successful applicant will have a technical background with a minimum of five years industrial experience from quality engineering and quality assurance, including experience with ISO 9001 and ISO/TS 16949. This position offers exciting opportunities for self-motivated and driven individuals who have a strong appreciation for Customer service. SinterCast is active in Europe, Asia and the Americas. This position is based at our Technical Centre in Katrineholm, Sweden and will require international travel.

For further information contact Steve Wallace – Operations Director, telephone +46 150 79440.

Send your written application marked "Quality and Supplier Development Engineer" before 15 April 2020 to: info@sintercast.com.
