

Ian Kershaw

Proposed Chairman of the Board

Ian Kershaw, a British citizen born in 1964 is proposed as the new Chairman of the Board of SinterCast AB by the Nomination Committee.

Mr. Kershaw holds a Masters degree in engineering with a specialism in materials from the University of Cambridge and an MBA from Cranfield University in the UK. He currently lives near the city of Cambridge, UK.

In 1985 he joined Perkins Engines Limited, progressing through base engine design and finance, culminating in the role of Project Manager for Advanced Engines.

After studying for his MBA, in 1993 Mr Kershaw joined Rolls-Royce & Bentley Motor Cars to develop and implement new manufacturing strategies for both mainstream production and the bespoke car division.

From 1998 to 2003, Mr Kershaw worked in global strategy consulting, first with Arthur D. Little then Efeso management consultants. During this period, he led a substantial number of both company and technology evaluations on behalf of financial and strategic investors.

In 2004, Mr Kershaw joined Ricardo plc, the automotive powertrain engineering group as a founding partner of Ricardo's strategic consulting division. He subsequently became a Board director of Ricardo's UK group business. During this period, he was responsible for Ricardo's strategic advisory, merger & acquisition support and operational improvement services to clients on a global basis. He was also key account Director for several vehicle manufacturers, OPEC, the EIB and private equity firms.

In 2017, Mr Kershaw joined Coryton Advanced Fuels as Executive Chairman to lead a two year turnaround of this manufacturer of specialist research and low CO₂ fuels for the world's transport industries and scientific laboratories.

Since 2019, Mr Kershaw has held several Board and advisory roles in automotive engineering, electric vehicle platforms, lithium ion batteries and medical devices.

He has served as non-executive Board Director and shareholder in IQGeo Group plc (geospatial and industry 4.0 software), Surface Generation (moulding & curing systems for high performance polymers and composites) and currently as Chairman of Biaco Limited, a developer of zero carbon heating, cooling and waste to energy systems featuring plasma technology.

Mr Kershaw currently holds no shares in SinterCast. The Nomination Committee considers Mr Kershaw to be independent of SinterCast, its senior management and major shareholders.
